

Thank you for calling SEPAC, your clutch and brake company. We've provided superior clutch and brake solutions for more than thirty years, creating innovative and adaptive solutions to meet the needs of each and every client. And we can't wait to work with you! Visit our website at sepac.com to learn more about everything that we have to offer.

Whether you're in the industrial, aerospace, defense, aviation, or energy industry, SEPAC is here with the clutch and brake products you need. With a new 28,000 square foot state-of-the-art facility, we love working with our customers to provide customized solutions for every problem. How can we help you? Let us know when we return to the line!

Here at SEPAC, we're always growing in our quest to provide our clients with the best products and services. From improvements to our tried-and-true, industrial-grade motion control products to original, custom-designed fabrications, we pride ourselves on hearing our customers' needs and creating unique solutions to the challenge at hand. Find out more when we take your call!

Since 1984, SEPAC has pushed the boundaries of design, creating effective brake and clutch solutions to fill even the most unique and exacting requirements. With full in-house capabilities including design, engineering, quality control, full prototypes, custom fabrication, and on-site manufacturing, we're ready to solve your toughest motion control challenges! We can tell you more in a moment.

Our mission here at SEPAC is to provide the highest standard motion control products and solutions for a broad range of applications and to consistently meet or exceed our customers' expectations. With AS9100 and ISO 9001 certification, you can count on our quality. We believe in the continuous improvement of our products and services to give our clients the best possible solutions. A representative will be back to the line as soon as possible to tell you more.

Located in Elmira, NY, SEPAC custom engineers and manufactures motion control products on site, including electromagnetic clutches and brakes. We provide innovative solutions of the highest quality and reliability to OEMs, distributors, and end users around the world. Our brake and clutch applications range from aerospace, healthcare, and defense to robotics, energy, and a wide variety of industrial markets. And we look forward to helping you! We'll return as soon as we can.

Our dedicated design engineering department here at SEPAC routinely creates new designs to meet the unique requirements of every customer. We also offer design modifications to catalog items in order to meet special performance requirements or integration needs. With an experienced team using the latest design and analysis technologies, you can trust in SEPAC to deliver exactly what you need. Find out more when we take your call!

SEPAC's machining capabilities are versatile and comprehensive. Using MasterCam together with our SolidWorks model files allows us to produce a range of geometries utilizing standard tooling or dedicated in-house fabricating fixturing. With an adaptable, responsive assembly and test department, we use our individual strengths to form a flexible, multi-functional team from the start to finish of the development of your product. Stop by sepac.com to learn more!

We're proud that our motion control products are American made and manufactured right here at our facility in upstate NY. This allows us to oversee every detail, from the initial concept to the final product, ensuring that we meet your needs precisely and provide you with superior brake and clutch solutions. We'll return to your call as quickly as possible.
