

Thank you for calling Stainless Steel Brakes Corporation! Family-owned since 1975, we're the industry leader in high-quality brake systems and components. With a high-performance muscle car heritage, our focus has always been on providing our customers with the best possible products and service each and every time. And we can't wait to talk with you! We'll return to your call in just a moment.

Need a little inspiration? Stop by ssbrakes.com! View our vehicle gallery, share your project in our customer photo gallery, and get full PDF versions of our latest marketing brochures and catalogs. Our site features articles on a wide range of topics, as well. Have a technical question about an SSBC product? Ask one of our techs by simply filling out a form! And don't forget to sign up to have exclusive SSBC deals sent right to your inbox. We'll be right back to take your call!

SSBC is a cutting-edge manufacturer of performance disc brake kits, aluminum caliper upgrade kits, slotted brake rotors, cross-drilled brake rotors, brake pads, disc brake components, and accessories. We first pioneered the stainless steel sleeved caliper for classic Corvette and Mustangs back in 1975, and we've been the industry standard for high-quality brake systems and components ever since! Find out about everything that we have to offer when we return to the line.

Get social with SSBC! Like us on Facebook to keep up-to-date with all of our promotions, pics of the latest projects, customer reviews, and so much more! Subscribe to our RSS feed to stay on top of articles chock-full of tips and tricks. Plus, view our super-informative videos on YouTube, follow us on Twitter, and connect with us on LinkedIn! Visit our website at ssbrakes.com to find out more.

SSBC offers a complete line of disc brake conversions and performance brake upgrades for classic muscle cars, late model performance vehicles, street rods and customs, trucks and SUVs, and sport compacts. Our products have been featured in a wide range of industry magazines with first-hand advice and glowing reviews. As the SSB industry technology leader, braking is what we do. We'll tell you more when we return.

How do you bench bleed a master cylinder? How tight should the wheel bearing be? What type of differential fluid should be used in the rear axle? How much torque should be used when tightening bolts? Find out the answer to these questions and so many more in our FAQ Solutions Center at ssbrakes.com. We're here to help you! We'll be back to the line as soon as we can.

Did you know that for every inch added to the diameter of your wheels, your vehicle's rolling mass multiplies 3 to 4 times? This drastically impacts how well you brake and slow down, putting a hefty burden on your brakes. Tweaking your engine can also severely undercut your braking power, causing your brakes to wear out faster or potentially not work when you need them most. Ask your representative for more information about all that we have to offer!

Visit us at ssbrakes.com to search for products by category or vehicle, find a dealer location near you, or view our show and event schedule. You can also find out more about shipping and returns. Plus, complete our brief online warranty form to register your products quickly and

easily! Learn more about everything we have to offer by stopping by our website or asking us when we return to your call.

At SSBC, braking is our passion. It's who we are. Our experts are dedicated to bringing you the best braking technology, giving you up to 25% shorter stopping distances. We're always on top of the latest technologies to improve our game and give you nothing but the best. Utilizing state-of-the-art CAD software for rapid product development, we're always working on the next best thing. With high levels of standardization and quality control that very few aftermarket companies can match, we're always looking for ways to serve you better. Visit us at ssbrakes.com to find out more!
